6st	Phillips head screw	Supplies
6st	Plug	- Pencil
		- Level
		- (Impact) drill
		- Masonry drill Ø6mm
		- Screwdriver

Determine the positions of the three coat hooks.

Tip: Do not hang the coat racks vertically above each other to prevent the coats from hanging over each other.
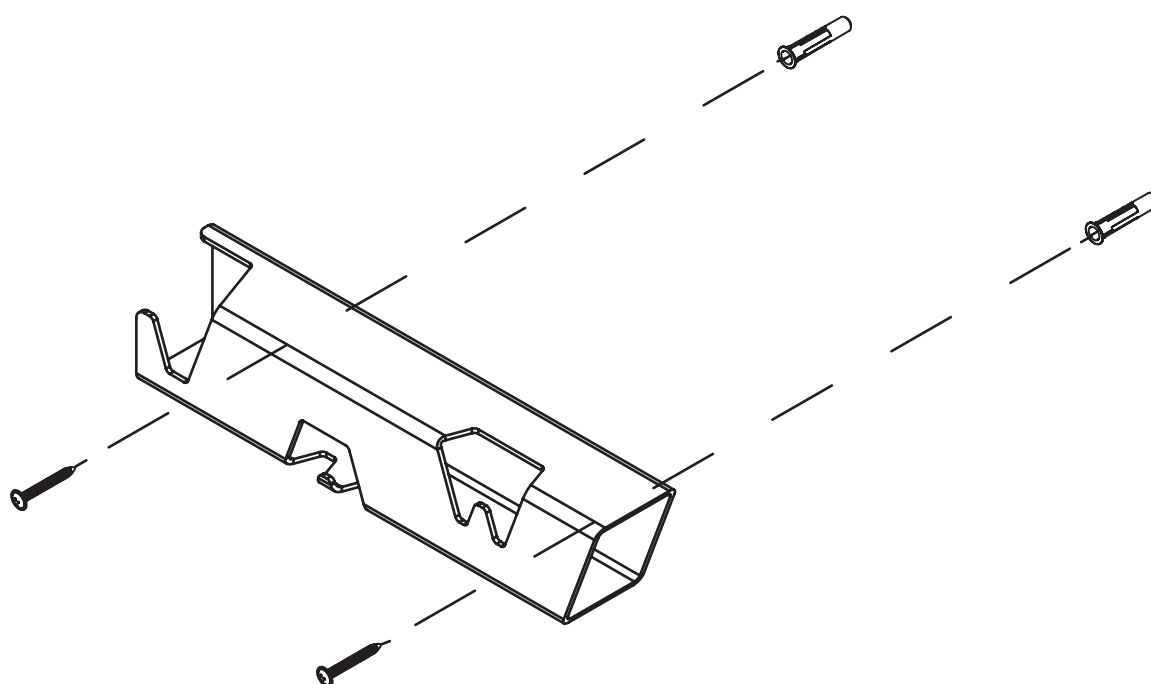

waterpas

Hold the coat rack against the wall at the desired height and mark the holes at the two positions marked in red.
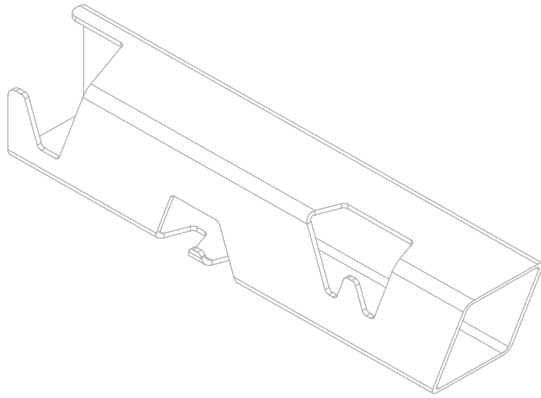

Make sure that the coat rack hangs level.

Drill the holes at the marked positions.

Add the plugs to the pre-drilled holes.

Secure the coat rack to the wall with the two Phillips head screws. Use a screwdriver for this.

Thank you for your purchase!

Have fun with your coat rack Jack Jr.
