– **Bleistift**
– **Ebene**
– **Schlagbohrmaschine**
– **Schraubenmaschine**
– **Steinbohrer Ø8mm**
– **Steckschlüssel 10**

01| Marking the wall
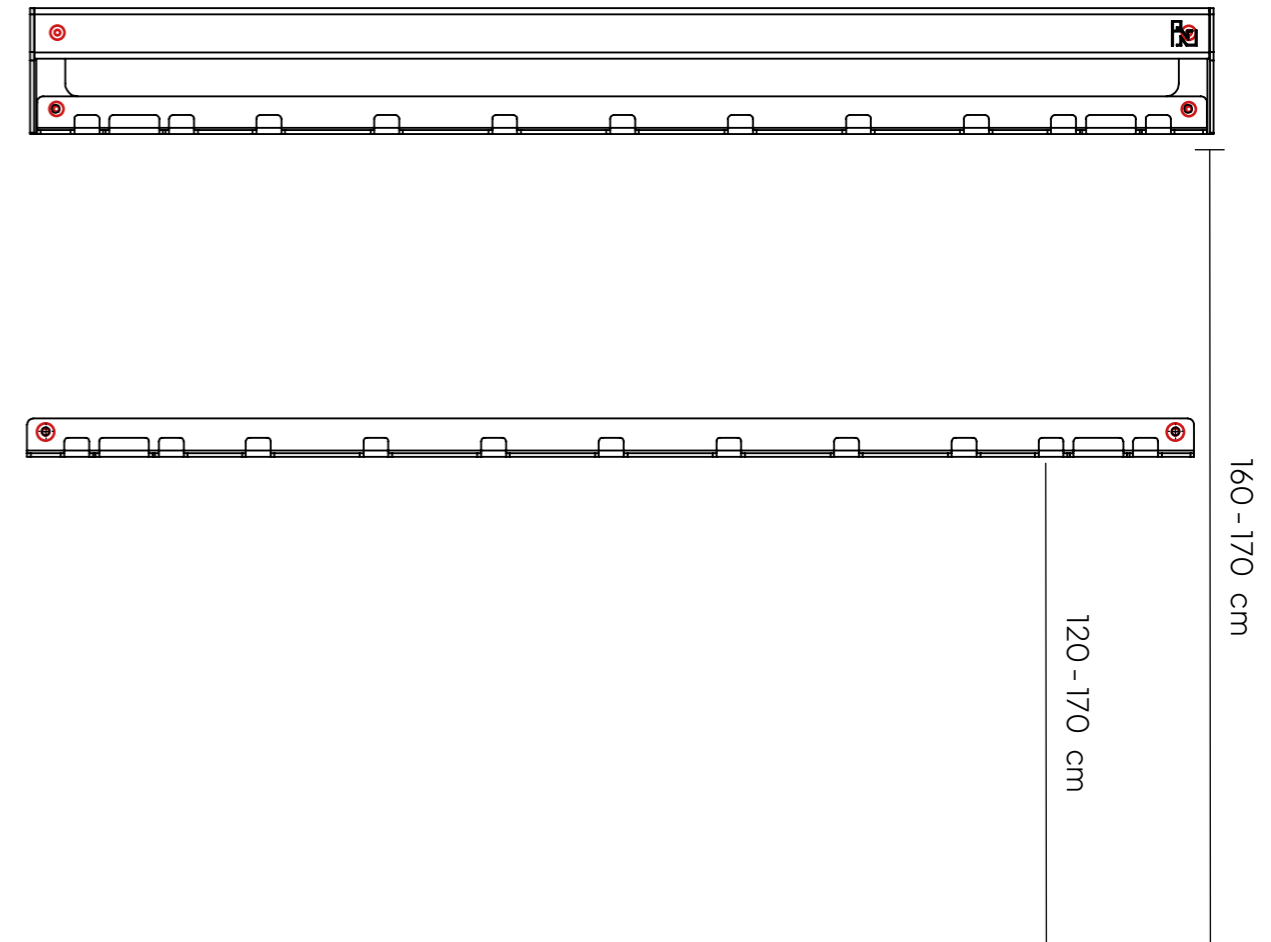

It is recommended to install the coat rack with two or more people.

160 - 170 cm

120 - 170 cm

Determine the desired height for the coat rack. The average height for a coat rack is between 160 and 170 cm from the ground.

You can choose to place the monorack separately from the coat rack. In that case, prepare six holes instead of four.
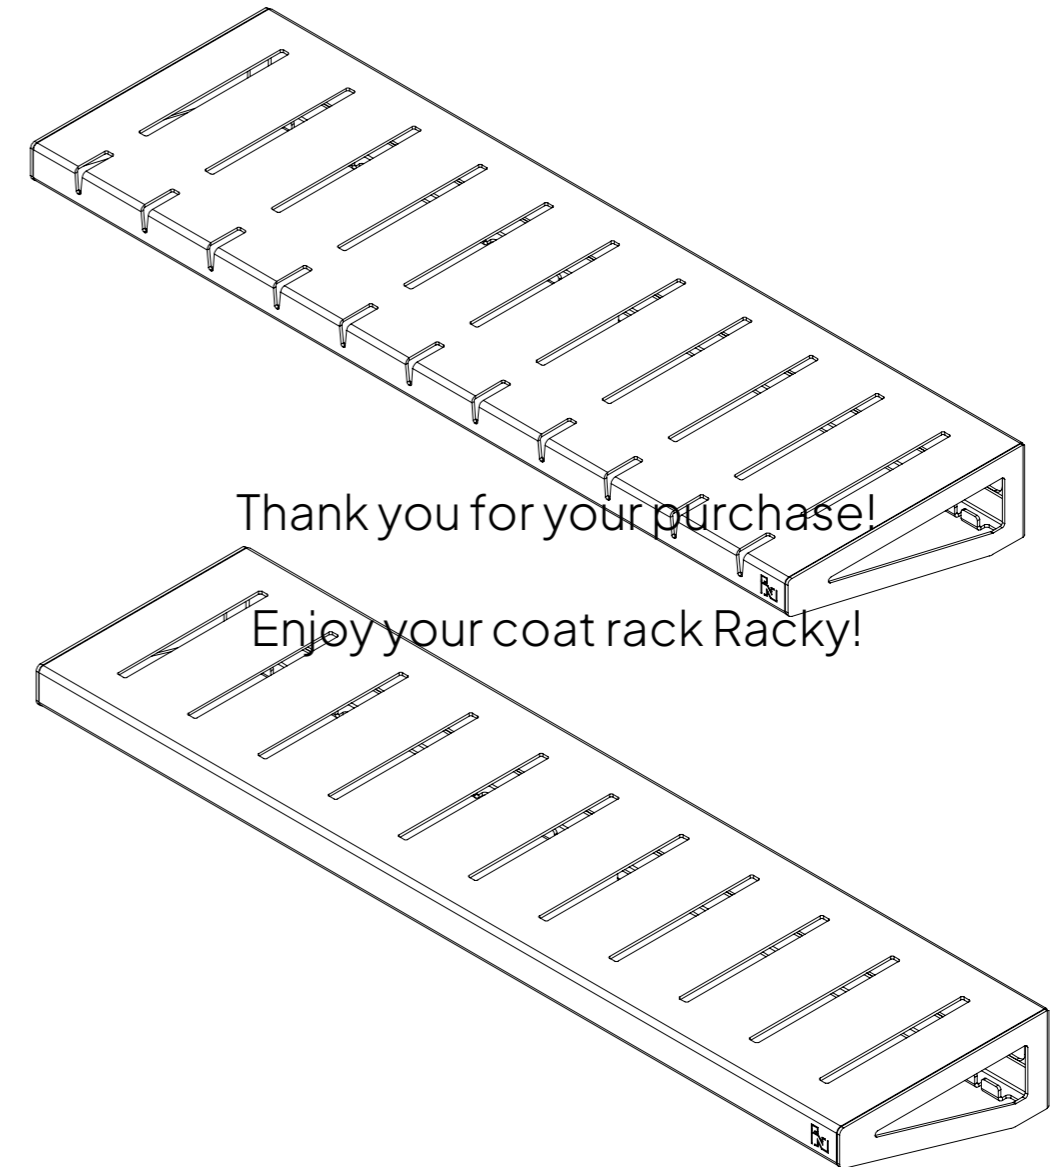

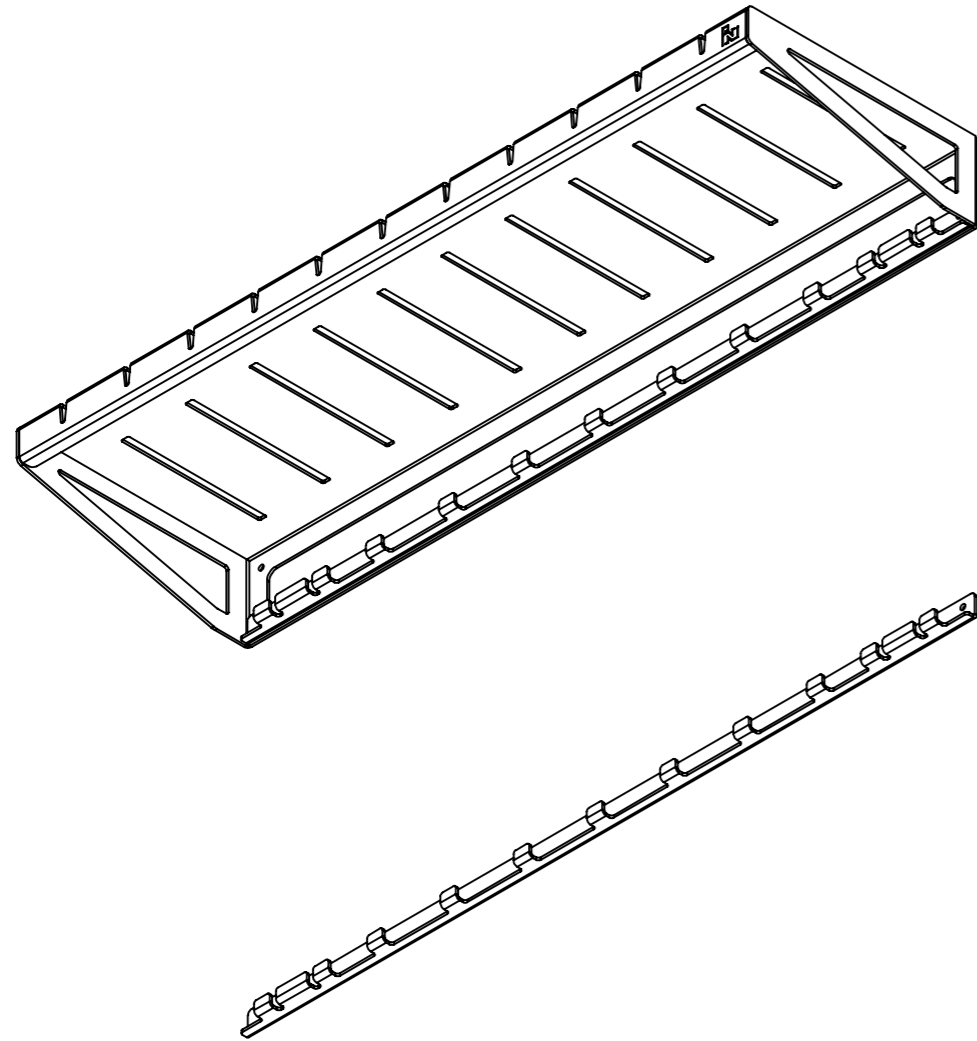

The average height for children is 120cm from the ground.

Hold the coat rack against the wall at the desired height and mark the holes at the positions indicated in red.

Make sure that the coat rack is hanging level.

02| Attach to the wall

Drill the holes at the marked positions Ø8mm.

Drive the plugs into the wall.

Use the bolts and a socket wrench size 10 to attach the coat rack.

Cover the bolts with the supplied cover caps.

Thank you for your purchase!

Enjoy your coat rack Racky!
